Re: League City Needs Protection From San Jacinto River Waste Pits

Dear Mr. Miller:

I am a resident of League City, south of the San Jacinto River Waste Pits near Galveston Bay. I know that the EPA has different options available for cleaning up the Superfund site, and I am writing to urge you to keep the site capped.

It is already difficult enough to live in our area with the constant risk of flooding. If you were to rule for hauling out the hazardous waste by trucks, it would expose all of us to that danger, especially in a flood or heavy storm. On top of that, with all of our road accidents, no one would be safe if one of those trucks somehow wrecked on one of our highways.

The science supports a permanent cap to keep those chemicals safely in the ground. The temporary cap has not leaked and should be maintained. Please keep all of us mind when making your decision.

Sincerely,

(b) (6)
